

## Market Tracker - Version Upgrader

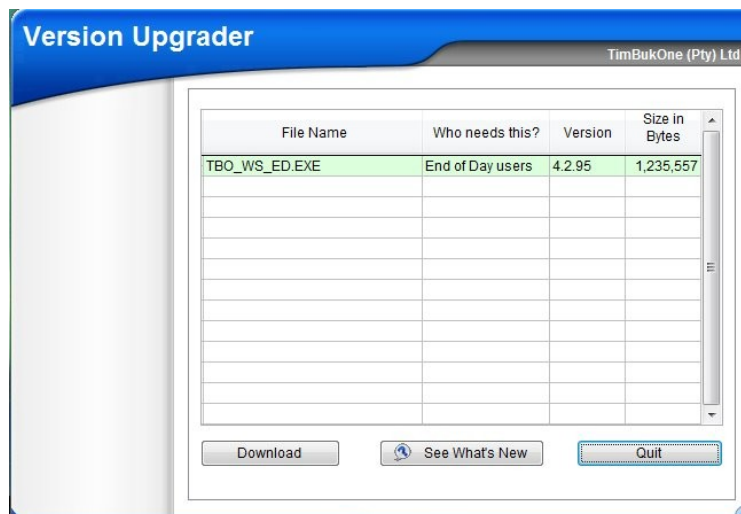

Double click on the Market Tracker Upgrader ICON, situated on the desktop.

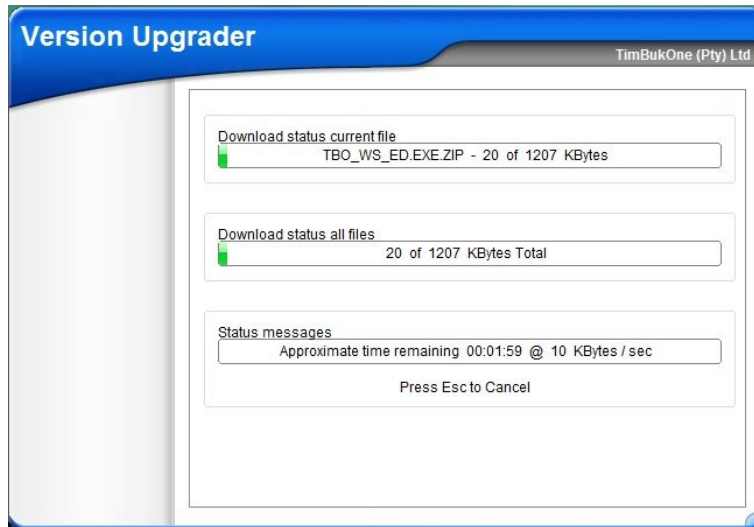

Click on, **Check for Updates.**

Should any upgrades files be posted and need to be downloaded a screen with green highlighted rows will appear ie. If there are any upgrade files available.

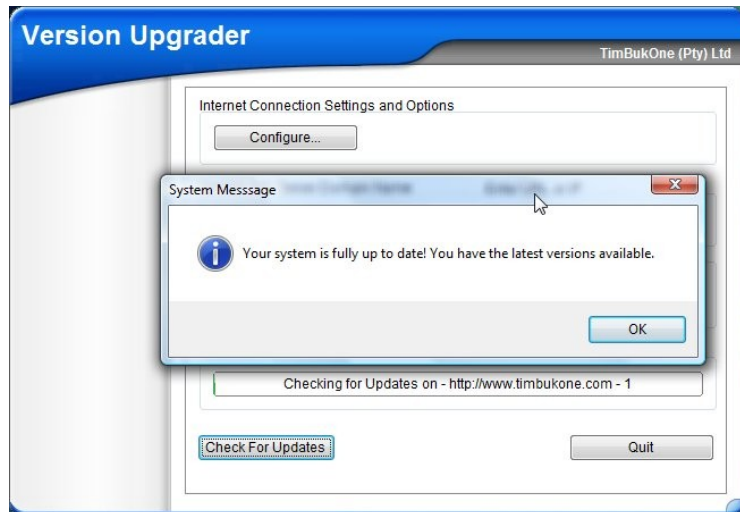

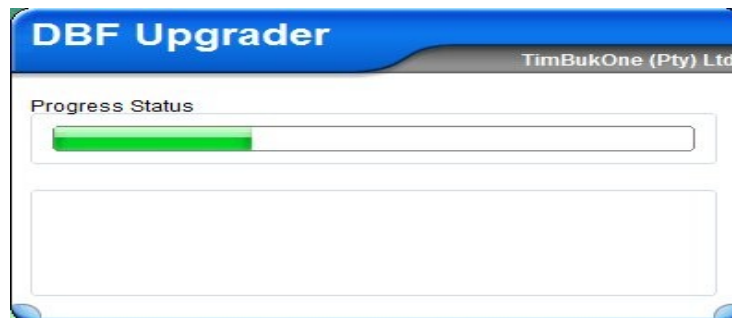

In order to activate the upgrade, click on **Download.**

The upgrades will begin and once again green rows will start streaming across your screen indicating the download process.

It will also run the **DBF upgrader** if it finds updated files for this software also.

A system message appear – click **OK**.  
Once complete, the upgrader will automatically close.
