Harmony's Integrated Report includes its audited annual financial statements for the 12 months ended 30 June 2014. These audited results contain no modifications to the financial results published on 14 August 2014, save for the three line items disclosed below. A full abridged report will not be published.

The annual financial statements include the following three reclassifications between the operating and investing activities categories on the cash flow statements:

i) Interest and dividends received (operating activities) and Increase in restricted investments (investing activities) increased by R7 million in the 2014 year

ii) Cash generated by operations (operating activities) and other investing activities (investing activities) decreased by R10 million in the 2014 year

iii) Cash generated by operations (operating activities) and net additions to property, plant and equipment (investing activities) increased by R133 million in the 2014 year and R312 million in the 2013 year. These changes relate to the adoption of IFRIC 20 Stripping Activities during the Production Phase of a Surface Mine.

The restatements had a net zero effect on the cash flow statement and had no impact on the income statement, statement of comprehensive income and the balance sheet.
