## Lithium Production Commences at Bald Hill

*PLEASE NOTE: ALL GRAPHICS HAVE BEEN REMOVED FOR SENS PURPOSES. PLEASE REFER TO TAWANA WEBSITE FOR THE COMPLETE ANNOUNCEMENT*

### Highlights

- **Lithium concentrate production commenced following commissioning of a new Dense Media Separation (DMS) circuit at Bald Hill**
- **Practical completion achieved and first concentrate produced**
- **DMS circuit ramping up to full production run rate over several months**

Tawana Resources NL (TAW:ASX) (**Tawana**) and Alliance Mineral Assets Limited (SGX:40F) (**AMAL**) are pleased to advise the commencement of lithium production at the Bald Hill Lithium and Tantalum Mine in the Eastern Goldfields region of Western Australia.

The spodumene (lithium) concentrate production is the result of ore commissioning through the newly constructed Dense Media Separation (**DMS**) circuit. The DMS will be ramped up to full production run rate over several months. Bald Hill, a joint venture project between Tawana and AMAL, is the first Australian mine to commence spodumene production since 2016.

### Highlights

DMS Plant construction activities have reached ore commissioning and spodumene production stage:

- Completion of water commissioning.
- Practical completion achieved by EPC contractor - Primero Group.
- Ferrosilicon media introduced to the plant and stabilised.
- Crusher commissioned and 20,000 tonnes of crushed ore stockpiled.
- Commencement of first ore feed into the processing plant.
- First spodumene concentrate produced.

Tawana's Managing Director Mark Calderwood said *"It is a great effort by everybody involved to take Bald Hill from maiden lithium resource to production in nine months including only seven months of construction from the ground up.*

*The focus now is to achieve steady state production from the Stage 1 DMS circuit and optimise lithium yields. Concurrently, the JV will work on completion of the Stage 2 lithium fines circuit design and re-commissioning of the tantalum circuits."*

## **About the Bald Hill Project**

The Bald Hill Project comprises four mining leases, one mining lease application, 12 exploration licences, eight prospecting licences and one general purpose lease totalling 774km<sup>2</sup>. The project is owned 50:50 by Tawana and AMAL.

First lithium concentrate product delivery is anticipated in April 2018.

Each of Tawana and AMAL executed separate offtake agreements in April 2017 (and subsequent variations thereto) for the supply of lithium concentrate from Bald Hill over a five-year term with pricing for 2018 and 2019 of US\$880/t (FOB Esperance) for 6% Li<sub>2</sub>O. The prepayments from the offtake agreements are being used towards the capital costs of the Project.

The Project is located 50km southeast of Kambalda in the Eastern Goldfields of Western Australia, and approximately 75km southeast of the Mt Marion Lithium project.

A current Indicated and Inferred lithium Mineral Resource of 18.9 million tonnes at 1.18% Li<sub>2</sub>O, and 149ppm Ta<sub>2</sub>O<sub>5</sub> at a 0.5% Li<sub>2</sub>O cut-off for the Project was calculated by CSA Global Pty Ltd.<sup>1</sup>

## **Forward Looking Statements**

This announcement may contain certain forward looking statements and projections, including regarding estimated resources and reserves, production and operating costs profiles, capital requirements and strategies and corporate objectives. Such forward looking statements/projections are estimates for discussion purposes only and should not be relied upon as representation or warranty, express or implied, of Tawana Resources NL and/or Alliance Mineral Assets Limited. They are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors many of which are beyond the control of Tawana Resources NL and/or Alliance Mineral Assets Limited. The forward looking statements/projections are inherently uncertain and may therefore differ materially from results ultimately achieved.

Tawana Resources NL and/or Alliance Mineral Assets Limited does not make any representations and provides no warranties concerning the accuracy of the forward looking statements, and disclaims any obligation to update or revise any forward looking statements based on new information, future events or otherwise except to the extent required by applicable laws. While the information contained in this announcement has been prepared in good faith, neither Tawana Resources NL and/or Alliance Mineral Assets Limited or any of their directors, officers, agents, employees or advisors give any representation or warranty, express or implied, as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this announcement. Accordingly, to the maximum extent permitted by law, none of Tawana Resources NL and/or Alliance Mineral Assets Limited, their directors, employees or agents, advisers, nor any other person accepts any liability whether direct or indirect, express or limited, contractual, tortious, statutory or otherwise, in respect of, the accuracy or completeness of the information or for any of the opinions contained in this announcement or for any errors, omissions or misstatements or for any loss, howsoever arising, from the use of this announcement.

## **End Notes**

1. All material assumptions and technical parameters underpinning the Mineral Resource estimates in the ASX announcement dated 11 October 2017 / SGX announcement dated 12 October 2017 continue to apply and have not materially changed since it was last reported.
